

## **SAVE THE DATE! November 13th to 17th, 2017**

**INTERCOH 2017 will be held at the Facultad de Ingeniería, Universidad de la República, Montevideo, Uruguay.**

**Deadline for abstract submission: February 1st, 2017**

**Abstract notification: May 1st , 2017**

**Conference dates: November 13th to 17th, 2017**

### **INTERCOH 2017 welcomes topics related fine-grained sediments**

Mud rheology and Fluid mud

Bed shear, Erosion and bed exchange

Siltation, Dredging and plumes

Coastal and estuarine hydrodynamics

Wetlands dynamics

Suspended matter and Flocculation

Sediment characterization

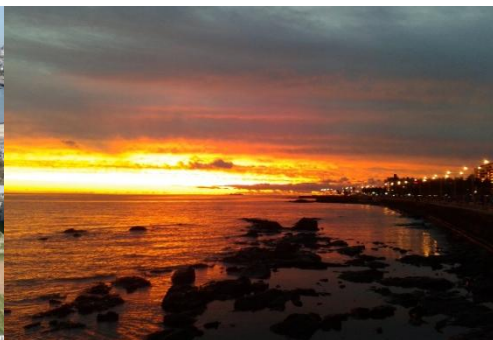

Biological and ecological controls

Coastal and estuarine morphodynamics

Unsuccessful studies and learned lessons

### **Montevideo - Uruguay**

Montevideo is the capital of Uruguay and administrative seat of MERCOSUR. It is an attractive city of shady streets, nice combination of extensive green areas, parks and squares, classic and modern architecture, which offers countless cultural alternatives and a wide range of first class hotels. It has an area of 530 square kilometers and great part of it traverses the entire waterfront and beaches of the city, many of them very close to downtown. It has a population of about 1.320.000 inhabitants which represents 40% of the total population of the country.
