quilt.itx

Type: Space Filling (Color).

The Quilt texture applies a repeating pattern of colored squares to an object. This textures allows you to alter the size, color, and number of "blocks" that make up the pattern. The texture has an Intensity parameter so the texture can be applied in a more subtle manner. There is also a Random Seed value that can be used to change the pattern.
(Use edit axis to change the size/position/orientation of this texture)

REQUESTER TABS

- ***Color***
  - ♦ Colors 1, 2, and 3: These are the colors that you can set for the three "block" colors.
- ***Controls***
  - ♦ Random Seed: This parameter is used to change the pattern in the quilt.
  - ♦ Pattern Pieces: This parameter controls the number of "blocks" that make up each repeated part of the quilt.
  - ♦ Intensity This parameter blends the texture colors with the colors that are already applied to the object. It can be used to morph the texture onto or off of an object.
