

| Talleres 2do semestre Tecnólogo Industrial Mecánico 2026 |       |        |           |        |         |  |
|----------------------------------------------------------|-------|--------|-----------|--------|---------|--|
| Horario                                                  | Lunes | Martes | Miércoles | Jueves | Viernes |  |
| 7:15                                                     |       |        |           |        |         |  |
| 7:30                                                     |       |        |           |        |         |  |
| 8:00                                                     |       |        |           |        |         |  |
| 8:30                                                     |       |        |           |        |         |  |
| 9:00                                                     |       |        |           |        |         |  |
| 9:30                                                     |       |        |           |        |         |  |
| 10:00                                                    |       |        |           |        |         |  |
| 10:30                                                    |       |        |           |        |         |  |
| 11:00                                                    |       |        |           |        |         |  |
| 11:30                                                    |       |        |           |        |         |  |
| 12:00                                                    |       |        |           |        |         |  |
| 12:30                                                    |       |        |           |        |         |  |
| 13:00                                                    |       |        |           |        |         |  |
| 13:30                                                    |       |        |           |        |         |  |
| 14:00                                                    |       |        |           |        |         |  |
| 14:30                                                    |       |        |           |        |         |  |
| 15:00                                                    |       |        |           |        |         |  |
| 15:30                                                    |       |        |           |        |         |  |
| 16:00                                                    |       |        |           |        |         |  |
| 16:30                                                    |       |        |           |        |         |  |
| 17:00                                                    |       |        |           |        |         |  |
| 17:30                                                    |       |        |           |        |         |  |
| 18:00                                                    |       |        |           |        |         |  |

|       |                                         |                                |
|-------|-----------------------------------------|--------------------------------|
| TIM10 | Taller 1: Ajuste y Montaje              |                                |
|       | G1: Lunes de 10:30 a 14:30              | G2: Jueves de 08:30 a 12:30    |
| TIM11 | Taller 2: Metrología                    |                                |
|       | G1: Lunes de 14:30 a 16:30              | G2: Lunes de 12:30 a 14:30     |
| TIM12 | Taller 3: Máquinas herramientas         |                                |
|       | G1: Jueves de 12:30 a 17:30             | G2: Martes de 08:30 a 13:30    |
| TIM13 | Taller 4: Motores de combustión interna |                                |
|       | G1: Martes de 14:00 a 18:00             | G2: Miércoles de 14:00 a 18:00 |
| TIM14 | Taller 5: Soldadura                     |                                |
|       | G1: Miércoles de 07:30 a 12:30          | G2: Lunes de 07:30 a 12:30     |

#### UBICACIÓN:

TIM 10, 11 , 12 y 14 se dictan en la Escuela de Construcciones Mecánicas en Veracierta N° 3280 esq. Chayos

TIM 13 se dicta en el Facultad de Ingeniería Reissig 565 (Laboratorio B del IIMPI - piso verde)

**IMPORTANTE!!**  
**NO CONCURRIR CON BERMUDA Y MUSCULOSA**  
**A LAS CLASES DE TALLER**
